Professional Summary

Recent Computer Science graduate with practical experience in full-stack development gained through internships and production-oriented projects. Built REST APIs, implemented React features, and resolved production issues while collaborating in Agile teams. Passionate about building scalable applications and contributing to high-quality software development.

Key Skills: Java • JavaScript • React.js • Node.js • Express.js • MongoDB • REST APIs • Git • OOP • Data Structures & Algorithms • DBMS • Agile Development

Internship Experience

Full Stack Developer Intern – BharatCrest, Remote

Jan 2026 – Mar 2026

Certificate

- Contributed to **ProfitPal**, a production-grade product used by 50+ FMCG vendors and café owners for business operations management.
- Engineered **5+ responsive frontend features** using React.js and created **10+ RESTful API endpoints** with Node.js and Express.js.
- Debugged and resolved **15+ live production bugs** and server-side issues, reducing system downtime by approximately 15%.
- Collaborated with a **4-member team** using Git and Agile sprints, delivering features on time.

Web Development Intern – IBM Skills-Build Learning Program, Remote

Jun 2024 – Aug 2024

Live | Certificate

- Built an **8-section responsive website** on SDG 11 (Sustainable Cities and Communities) – Home, Resources, Community, Tools & Data, Profile, Educational, and Feedback – using HTML, CSS, and JavaScript.
- Ensured cross-browser compatibility and WCAG-aligned accessibility through semantic HTML and responsive CSS layouts.
- Followed a Git-based workflow, managing feature branches and resolving merge conflicts within the 8-week program timeline.

Education

Bachelor of Technology (B.Tech.) in Computer Science and Engineering

2022 – 2026

Dr. A. P. J. Abdul Kalam Technical University, Lucknow

CGPA: 7.5

Technical Skills

- Languages:** C, Java, Python, JavaScript, SQL
- Frontend:** React.js, Next.js, Tailwind CSS, HTML, CSS
- Backend:** Node.js, Express.js, REST APIs, JWT, MVC Architecture
- Database:** MongoDB, MySQL
- Core CS Concepts:** DSA, OOP, DBMS, Operating Systems, Computer Networks
- Tools:** Git, GitHub, Docker, AWS

Projects

OneK@rt – Voice-Enabled Shopping Platform with Admin Dashboard

Live Demo | GitHub

MERN Stack — REST APIs — Deployed on Render and Vercel

- Built a three-tier platform with dedicated frontend, backend services, and admin dashboard for managing users, inventory, and orders.
- Added voice-based navigation, category filters, size selection, and secure authentication using Firebase and JWT.
- Supported online payments and Cash on Delivery, reaching 38+ registered users and 15+ completed orders on the live platform.

School ERP and Content Management Platform

Live Demo

MERN Stack — MongoDB, Express, React, Node.js — Deployed on Vercel and Render

- Engineered a three-tier platform for a real educational institution with separate frontend, backend, and admin panel.
- Built an admin dashboard to manage achievements, notices, admissions, sports activities, facilities, and other website content dynamically.
- Designed secure REST APIs with JWT authentication and responsive interfaces, enabling non-technical users to update content easily.

TSA Studio Design

Live Demo

- Designed and built a conversion-focused landing page for an interior and exterior design studio, featuring a hero section, trust-building stats, and a clear call-to-action.
- Crafted reusable, animated UI components (navigation, service highlights, testimonials) using Tailwind CSS for a mobile-first, fully responsive layout.
- Optimized page load speed and SEO through Next.js image optimization and routing, then deployed the site on Vercel.

Certifications

- JavaScript Training – Spoken Tutorial Project, IIT Bombay
- Python Training – Spoken Tutorial Project, IIT Bombay
- Java Training – Spoken Tutorial Project, IIT Bombay
